

## PERSONALIZATION PROGRAM

---

Polyguard and Co. has put together a simple program that can enhance the image of your business, increase your bottom line profits and give the families a positive lasting memory at the graveside.

If you are already doing video tributes for your families, you will have the pictures that your families bring to you for the video. The family can choose the photos that they would want to use for the center of the vault and the side panels of the vault. If the family is not providing photos, they can choose to have the vault personalized with standard designs that we have selected in the sample book. The CD has the same designs as the book making it easy for the printer to add the names and dates to the panel making the vault personalized for their loved one.

The panels can be placed onto the vault with 2-sided tape or any adhesive of your choice. Some families elect to have them put on with Velcro strips so they can take the panel home with them after the graveside service. There is no set way of providing this service to your families. Whatever works best for your situation is what works best.

Most local printers or photography shops are able to print these out if you are not set up to do this. They can be printed on any type of material that would be resistant to water if it rained at the cemetery. You are welcome to call our local print shop at [307-885-9000](tel:307-885-9000) and talk with Larry Chavez. He can answer questions that you have about the printing. We have also located a printer that is capable of printing this project for around \$1800.00. An Epson 4880 stylus pro printer with a 17" capability will print on various materials even vinyl.

The finished panels will be sized as follows:

Center	– 13 .5" x 42"
Side	– 13.5" x 8"

Please feel free to call us at [1-800-654-1067](tel:1-800-654-1067) and we will help you with any questions you may have.
